

Easy as 1-2-3!

1
Clean catheter with antiseptic,
then apply talc for easy glide

2
Insert catheter

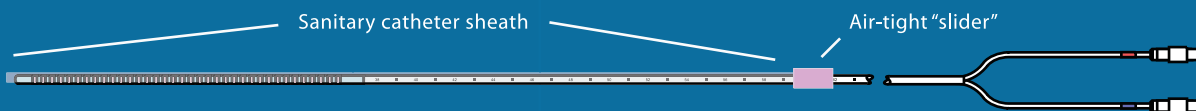

3
Secure "slider" to assure
all air is removed

90% Reduction in Cleaning and Disinfection Time!

The ManoShield™ disposable catheter sheath saves you from the tedious and potentially hazardous task of cleaning and disinfecting the catheter between each clinical use. It's advanced design minimizes the risk of contamination while maintaining the highest possible catheter performance. All components are included to quickly install, remove, and prepare the catheter for the next the procedure. A simple integrity check verifies that the sheath was not compromised during use. Your patients will appreciate the use of the sanitary ManoShield disposable sheath – eliminating questions about insertion of a reused device.

85 Centimeters of Sanitary Protection!

- Minimizes catheter wear and tear during the cleaning process

- Microthin design provides high patient comfort level

- Post procedure integrity check insures contamination protocol

- Latex-free, Hypoallergenic
